AB A progress report is presented on the use of centrifugal sludge dewatering, fly ash addn., and heating as dewatering aids, aerobic thermophilic sludge destruction, and the lime precoat color removal process in the treatment of mill effluents. Aeration and recycling of stabilization basins greatly improves O transfer in them and reduces B.O.D. appreciably.

IT Ashes

(fly, paper-pulping effluent treatment with)

IT Drying

(of paper-pulping liquors and sludges)

IT Decolorization

(of paper-pulping waste liquors, CaO precoat in)
